Greetings from "New York's Best Rock Station" (September 30 New York Press -- who were thankfully quick to point out that rock is just the tip of the iceberg.) There's a hell of a lot of other music being played here in addition to "rock". There are no quotas or restrictions on musical selection for our DJs. And so we have 60 unique programs who have in common a passion for whatever music they choose to play for our listeners.

This playlist documents all the records, cassettes and CDs that we've been able to get our mitts on this month. The records at the top of the list are those that were played the most during the month.

....The new LCD will be out this month. This is your last chance to get the summer issue, free for the asking. Some of the highlights are Rob Weisberg's article on international pop, which covers four pages and does not once use the term "World-beat" (Amazing!)and Jim Wheat's (fake) record reviews (Genesis P-Orridge picked up a copy here at the station and a month later the new Psychic TV record arrived addressed for Jim. I hope Genesis isn't having too much trouble finding a copy of that rare Butter On The Brain lp)...CONTEST: find the fake record on this list and win a free WFMU designer rain poncho.

Take it easy,

Dain Newgarden
