

PHONOANOMALIES

A TOTALLY NEW RECORDING FOR HI-FI BUGS!

STEREO

LO BUE

ORBITS THE WORLD

SO **YOU** DON'T HAVE TO!

What are Phonoanomalies?

Authorities differ on this question, and as yet have come up with no conclusive answers. But one fact on which they all concur is that they know 'em when they hear 'em. That's why our Master of Ceremonies, Keith E. Lo Bue has taken on the formidable task of providing a sort of aural road map, if you will, of this *terra incognita*. But be warned, dear listeners, the road is not always pristine; many are pocked with holes, skips and ugly dips. But if you pause on your way to study the scenery around you, you may soon notice - barely at first, then more noticeably - that you've *been here before!* For Mr. Lo Bue is cleverly, and with devilish precision, duping each and every listener into believing they've heard these melodies somewhere else. Of course, we know that's impossible, but this nagging feeling may best describe the elusive *Phonoanomalitus Vinylia*.

You'll know it when you hear it...and hear it you will!
